

SEND Occupational Therapy Newsletter

Autumn Term

Impact from The SEND Therapy Team

Sensory Circuit Training to School Staff:

"The training was fantastic. Staff were supported to think about how this could be implemented into their school. Every class in school now completes a sensory circuit at lunch time, in class using a whole class approach."

Fun with Food Group:

"Children are more willing to explore different textures in play and at meals times. We have since had a taste testing theme for our topic and children were able to engage with each piece of food."

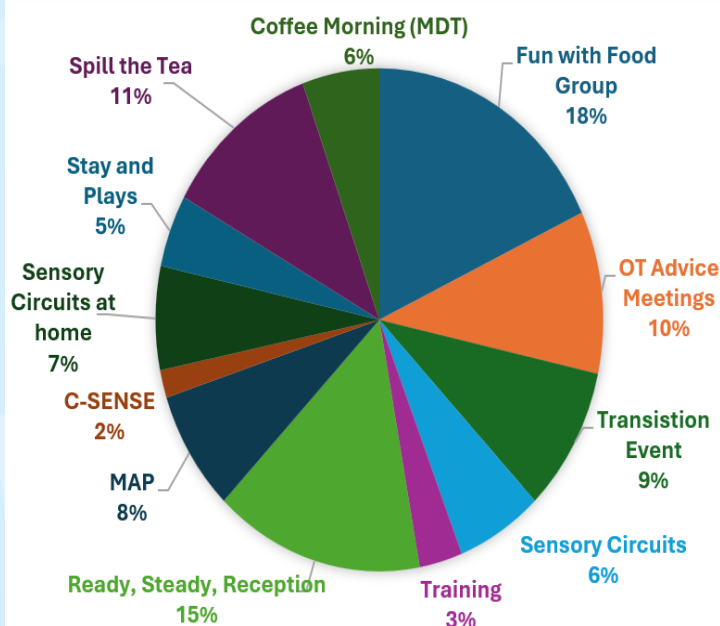

Coffee Morning:

"OT advice really helped my son to improve most of the things he has been going through. They are a fantastic team. Thank you very much for your amazing job"

Contact SEND Occupational Therapy if you would like further information around how the team can support the workforce & families within your settings.

How have SEND Therapy supported the workforce & families in Birmingham?

Events attended...

In the Summer term, SEND Therapy Team attended the SENCo Survival and SENCo Briefing to discuss how the team can support mainstream schools within Birmingham. These events are for new SENCos to discover how they can support children within their setting. Discussions were held around streams of work and how to access the services.
